

# FocalPoint

## Position USB Cables With A Rotation and Twist

FocalPoint-USB™ is the USB Cable with rotation and snap in capability which provides a means to position USB cables in the direction away from your desktop, laptop or USB device. FocalPoint-USB makes an office space a better looking environments.

**FocalPoint-USB™ rotates, bends and snaps into the position – Cables are directed where you want them.**

### Position Cables For All USB Devices:

- External Drives
- Scanners
- Hubs
- Printers
- Cameras
- And More

**FocalPoint USB Cables have 360 Degrees Rotation Capability**

**Control The Direction Of Your Cables...**

**FocalPoint-USB Cables Snap Into Position**

## The Advantages of FocalPoint-USB Cables:

Standard USB cable depicted in the photographs above have approximately a 4" bend radius. FocalPoint-USB has 1.70". On a crowded desktop this is a lot of valuable space.

The USB connection with your desktop computer or laptop will be greatly improved if the USB plug is not under stress from the weight of the cable. FocalPoint-USB cable relieves this stress point.

FocalPoint-USB helps to keep cables from bunching up and becoming a pile on your desk. Once you snap the cable into the position the cable can be directed to the back of a desk and away for your computer.
