Press Release

SQ Flash Memory Card - New Generation Of Flash Memory Cards With Double the Speed of Existing Cards

Los Angeles, CA, January 9, 2007---
Sample On Request introduces a new breed of flash memory card with double the read/write speed of existing flash memory cards. The SQ card is a patented mini memory card which is light weight and small in size. The SQ card is the optimum in portable data storage devices. Each SQ card is packaged with a USB 2.0 interface adapter to connect to any USB port. The ShareCard is also available to provide SQ card users with the capability to upload and download files while mobile and away from laptop or desktop computers.

The ShareCard requires no PC to download remotely from to the SQ

card to the integrate flash memory integrated in the ShareCard itself. Download any file, folders, music, photographs and more. With the ShareCard and the SQ flash memory card the user connects their device directly to another users, without the need for a PC.

The SQ flash memory card is available in a 1GB, 2GB and 4GB capacity. The SQ card is the first of its kind which can insert in any direction. No other memory card match up to the SQ card which patent technology provides the fastest speed

of 60MBs. The read speed is 32.4MB and the write speed is 21.5MB for the 2GB version. The 1GB version has a read speed of 24MB and a write speed of 12MB. Compare this to other existing flash memory cards which have read speeds of 2.8MB and write speeds of 3.2MB.

The SQ card has golden prints on each side of the card which providing a life expectancy four times longer than other memory cards. The SQ card operates with any operating system including Windows98SE, ME, .2000, XP, MAC OD9.X and MAX 10.X. The SQ card supports Windows Vista "ReadyBoost".
